2. FBIS assumes annual rental costs on these tracts of land effective 1 July 1963. We will also be required to assume prepaid rental charges already paid by IBS. No direct payment to IBS will be required. FBIS will pay the District Engineer when billed, and the District Engineer, Okinawa, will grant a corresponding credit in land payments to IBS.

3. In spite of the charges involved, it is believed that acquisition of this tract of land by FBIS is a timely and prudent action. We now have sufficient land for construction of additional housing at such time as funds are made available. In addition, the FBIS housing area is protected against possible release of this land by IBS, and its use in an undesirable manner by the Okinawan land owners.
